# TEXTILE STRIKE CALL ISSUED RELIEF FUNDS INVESTIGATION ORDERED

## LEGISLATION FOR ISSUANCE OF BONDS MEETS WITH DELAY

## BOTH HOUSES ORDER INVESTIGATION INTO EXPENDITURES RELIEF MONEY

AUSTIN, Aug. 30.—(P)—Both houses of the Texas legislature today ordered an investigation into the expenditure of state and federal relief funds by the Texas relief commission in advance of action on a bill to issue additional state relief bonds.

Both investigations likely will get under way tomorrow.

Resolutions were adopted in the house and senate demanding that the Texas relief commission furnish a full and complete accounting of the funds it has received and the purposes for which it was disbursed.

Members recounted reports of waste and extravagance in administration of relief in urging support of the resolutions.

The commission, it was reported, is preparing a financial statement that may be submitted to the legislature today.

The house ordered a bill to issue \$9,500,000 in state bonds, previously reported favorably by its state affairs committee, recommended to the house as a committee of the whole. The governor and the relief commission were requested to sit with the house in "a frank discussion" of relief problems.

Just seeking information.

No charges of misuse of funds were made in either resolution, sponsors stating they merely were seeking information and wanted to prove or disprove reports that had been circulated.

Representative W. C. Duvall of Fort Worth said it had been reported to him that corps of men and women were paid \$30 and \$40 a week while attending a school to "become expert relief workers"; that in many instances persons on relief owned and operated their own automobiles; that tenants were leaving their farms and going on relief and that Mexicans in Fort Worth were refusing farm employment for fear they could not get back on relief rolls.

Duvall said it also had been alleged the relief commission had paid \$25 an acre for land worth three dollars; that relief funds were being used to build a school house and that cement was purchased without competitive bids.

Senate Resolution.

The senate resolution ordered the investigation "for the purpose of inquiring into the adequacy of the present statutes to regulate properly the administration of relief funds of Texas and into any

## PRESIDENT VISITS WEST POINT

Motoring down the long road past many who are destined to become the future generals of the United States army, President Roosevelt is shown at West Point, N. Y., where he reviewed 900 cadets. It was the first presidential review since 1922, and President Roosevelt's first official visit to the military academy. The arrow points to the president.

## New York Store Cancels Debts Its Customers

NEW YORK, Aug. 30.—(P)—The Hearn department store announced in newspaper advertisements today it had cancelled customers' debts aggregating \$176,436.88.

Earlier this week the firm said it would discontinue all dividends for one year in order to lower prices and stimulate buying.

The Hearn announcement today said:

"Several thousand people owe Hearn for debts incurred on time payments before this store went on a cash basis two years ago.

To them we say: 'Forget it! There's a new deal. You owe us nothing.'

"To that \$176,436.88 we formally and financially relinquished all claims."

## GERMAN NAZIS CONVINCED OF VICTORY IN SAAR PLEBISCITE ARE MERELY COUNTING DAYS

## GREAT MOVEMENT OF GOLD CARRIED OUT FROM FRISCO MINT

## INGOTS ESTIMATED FROM ONE AND HALF TO TWO AND HALF BILLIONS

SAN FRANCISCO, Aug. 30.—(P)—One of the great movements of gold in the history of the world was under way today.

Ingots of the yellow metal, variously estimated as worth from \$1,500,000,000 to \$2,250,000,000, were en route to the Denver mint from the San Francisco mint under a heavy guard of picked soldiers.

While machine guns bristled from nearby buildings, fire truck searchlights flooded the area and hundreds of soldiers, postal inspectors and city police surrounded the mint, a dozen small trucks backed up to a temporary load and platform at the side of the old stone structure last night to take on their precious cargo.

When all were loaded, each with a ton of gold, they moved as a caravan, heavily guarded with powerful searchlights lighting the way, to the depot where the metal was placed in three small cars.

For hours this procedure was repeated. Finally the last ingot of gold, at least in the present shipment, apparently had been moved. Officials declined to dis-

(This is the second of a series of articles presenting issues involved in the forthcoming Saar plebiscite.)

By JOHN A. BOUMAN

(Associated Press Foreign Staff)

BERLIN, Aug. 30.—(P)—German Nazis, glancing at the calendar, see it will be sound-so many days before the Saar will "unite with the fatherland."

In Germany no one admits there can be any other outcome of the Saar plebiscite Jan. 13, 1935. It is not even deemed possible the Saar may decide to retain its present status under the League of Nations.

Indeed, Germans in all seriousness often ask why France does not simply hand over the Saar and eliminate the necessity for a plebiscite.

Citizens of the reich feel that the Saar always has been a part of the nation. Official reference works show the region as a section of Germany.

Chancellor Hitler's speech at Ehrenbrettstein Sunday marked the beginning of an intensive campaign to achieve reunion by a majority which will impress the world.

"The return of the Saar to the reich is really effective today," said a government spokesman after Hitler's address.

Underground Activity.

For years there has been much underground activity by factions for and against union with Germany. Numerous German socialists, communists and others, fleeing from Hitler's wrath, took refuge in the Saar, and from there they sniped at the Nazis with impunity.

The activities of these Saarland

opponents of German ambitions and their propaganda published in the Saar have long been irritating to the Hitler regime. The

## PROBE OF MUNITION MAKERS METHODS IS READY BE STARTED

## AMERICAN LINKS IN INTERNATIONAL CHAIN WILL BE SCRUTINIZED

WASHINGTON, Aug. 30.—(P)—

American links in an international munitions chain were disclosed today to be ready for open scrutiny when a senatorial inquiry into the trade opens next Tuesday.

The wide scope of the inquiry on which investigators have been working in secret for weeks became plain when it was disclosed that:

1. A so-called "international submarine trust," with an alleged American tieup, will be the first object of scrutiny by the special Senate committee.

2. Solely, manufacturers of munitions makers will be investigated. The committee workers will seek to determine whether arms salesmen have succeeded in breaking through embargoes on munitions.

3. Another subject will be the

(Continued on Page Nine)

## VISIT OF ALLRED TO GARNER STARTS POLITICAL RUMORS

## VICE PRESIDENT IS GIVEN PROMINENT MENTION FOR NATIONAL COMMITTEEMAN

AUSTIN, Aug. 30.—(P)—Vice-President John N. Garner was given prominent mention today as a prospect for democratic national committee from Texas, when it became known at the capital that James V. Allred, democratic nominee for governor, conferred yesterday with the vice president at Uvalde, Garner's home.

Allred, who was at his office today for the first time since last Saturday's primary election, declined to comment on the report he would support Garner for national committee to succeed former Governor James E. Ferguson at the democratic state convention in Galveston September 11 or whether Garner was a candidate.

When Vice President usually speaks for himself, Allred said. Friends, however, expected an announcement from Allred within a few days.

Allred's visit to Uvalde aroused considerable speculation as to

(Continued on Page Four)

## FULL MORATORIUM FOR YEARS FOREIGN PLAN OF GERMANY

## ONE OF HEROIC MEASURES NEEDED LEAD WORLD FROM ECONOMIC IMPASSE

BAD EILSEN, Germany, Aug. 30.—(P)—A "full moratorium" for several years on Germany's foreign debts was proposed today by Dr. Hjalmar Schacht, acting minister of economics and president of the reichsbank. This, Schacht told the international conference of agricultural science, is one of the "heroic" measures needed to lead the world from an economic impasse which is "almost hopeless."

He warned other countries of the "communist menace," citing "farmers' plots" and the "extraordinary wave of strikes" in the United States as "stern warning signals."

"In Germany, the country to suffer first and most severely," he said, "the danger of bolshevism was averted at the 11th hour. But in many foreign countries there is dangerous unrest."

"In foreign countries there was a tendency to be very sceptical of the communist menace in Germany. If the crisis lasts much

## HEAD OF COTTON TEXTILE INDUSTRY BLAMING WORKERS

## SLOAN, ALSO HEAD OF CODE AUTHORITY, GIVES ONE SIDE OF SITUATION

By TAYLOR HENRY  
(Copyright, 1934, by Associated Press)

NEW YORK, Aug. 30.—(P)—The cotton textile code authority put the question of "fawndmaking by strike" up to the American public and the 682 industries under NRA codes today.

Speaking as a governmental official—chairman of the cotton textile code authority—George A. Sloan told the Associated Press today that the American people are now faced with a demand that consideration be given to amending a law under the threat of force.

Besides Boze, Mrs. Gertrude Jeffreys of Dallas and Foote also were burned. The fourth occupant, a man named Terry of Dallas, was not injured.

Twelve hundred feet above the earth Boze loosed one of his bombs for the benefit of newsreel cameramen. It exploded and sparred the right wing. Flames swept over the ship as three more bombs which Boze attempted to throw out also exploded.

Foote dived the plane toward a cotton field and made a perfect landing in the blazing ship.

The occupant clung to the plane and it was consumed in flames several minutes later.

Boze was not burned badly outside of a small burned place on the side of his head, he escaped

the plane.

It was his third trip into the clouds with Boze's "rainmaking" bombs. On the two previous flights it rained briefly after bombs had

(Continued on Page Nine)

## MAINE DESTINED TO BE FIRST STATE TO PASS ON NEW DEAL IN ELECTION ON SEPTEMBER 10TH

(By The Associated Press)  
Voters in Maine will pass on the new deal by an election next month before political parties in 15 other states are ready for the issue.

When Maine Sept. 10 elects a senator, three representatives and a governor, candidates for congress will not have been nominated in 15 other states.

Interpretation of Maine as a barometer forecasting the trend of elections in 47 other states Nov. 6 will be extensive. Maine's ballots and those cast in the other states in November will fill 35 seats in the senate which become vacant this year and all 435 seats in the house of representatives. The state now consists of 63 democrats, 30 republicans and 7 independent.

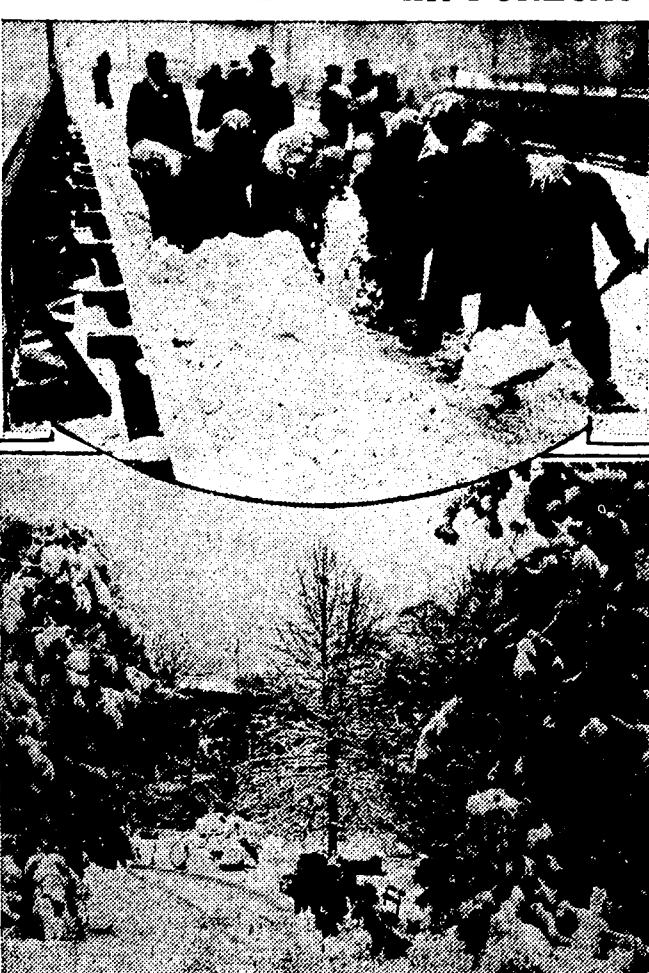

The house has 312 democrats, 115 republicans, one farmer-labor and three vacancies. Differences between those figures and the makeup of the 74th congress, which convenes Jan. 3, will measure the opinion of voters on the new deal.

The calendar for the first ten days of September follows:

Sept. 4: Utah—Democratic con-

(Continued on Page Seven)

## ANOTHER COLD WINTER FORECAST

Despite the opinion held in some parts that the coming winter will be a mild one because last winter was severe in many sections of the nation, scientists think differently. Delos H. Wray, meteorologist at Rochester, N. Y., has joined other eastern weathermen in the forecast that 1934-35 will see a winter just as hard and long as in 1933-34. By their less scientific but often effective methods, Nevada Indians also assert the signs point to a stormy winter period.

## FIFTEEN REFINERS ENJOINED THURSDAY BY RR COMMISSION

## PROHIBIT VIOLATING NEW ORDER REQUIRING AP. PROVED TENDERS

AUSTIN, Aug. 30.—(P)—The Texas railroad commission today enjoined 15 East Texas refineries and four railroads from violating a new order prohibiting the movement of crude oil products without approved tenders from the commission.

The injunction supersedes that granted the refineries several days ago enjoining the commission from enforcing its previous order.

Commissioner E. O. Thompson said the commission's original order had been revised to meet objections on which the refineries had obtained injunctions. Refiners complained principally that it was physically impossible to comply with the order because of the mass of detailed data that would be required.

Thompson said the original record of the legality of crude production was made a perfect basis of the new order.

"Australia today is completely in the hands of Mussolini," said Winkler, a fugitive from his country.

In a startling interview he listed the Vatican as among the contributors to von Starhemberg's Fascist Heimwehr (Home guard) in its fight against Nazism.

Mussolini, he said, smashed negotiations when Germany and Austria were on the point of an "agreement" 18 months ago.

"Von Starhemberg, present vice-chancellor, has received not less than \$1,000,000 since 1929 to do Italy's dirty work in Austria," Winkler said.

"The horns of the dilemma are these:

If the national leaders support Sinclair, republicans will point to the socialist party and to what they call his "Marxian" plan to end poverty in California.

"If they do not support him and conservative California democrats swing to the republican candidate, Frank E. McRae, some leaders fear the turnpike will impede re-election of democrats to the house of representatives.

Postmaster General Farley was silent yesterday. He sent no congratulations to Sinclair, but word at democratic headquarters was that no gubernatorial candidate was getting congratulations.

Harry L. Hopkins, however, called Sinclair's victory "great business."

Republican leaders already have started to make the most of the

## CESSATION WORK IN GREAT INDUSTRY SET FOR SATURDAY NIGHT

## STRIKE CALL CLAIMS TEXTILE INDUSTRY DEFEATS GOVERNMENT PURPOSE

WASHINGTON, Aug. 30.—(P)—A strike of cotton textile workers was called today and a little later, a threat to call a strike of workers in the silk and wool industries unless employers complied with conditions laid down for the cotton textile industry was voiced by Francis J. Gorman, chairman of the textile strike committee.

Gorman said telegrams had been sent to the silk and wool industry, asking an immediate conference.

At the same time, Gorman announced the strike committee would confer with Lloyd Garrison, chairman of the national labor relations board, this afternoon in an effort to find a possible adjustment of differences.

"There will be no settlement," he said, "unless we obtain concessions from the employers."

The conference this afternoon was a continuation of one held with Garrison last night. Gorman said Garrison called on the United Textile Workers to aid in exploring settlement possibilities.

The strike head announced the executive council had just completed a conference with the silk group headed by Frank Schwartz, of Paterson, New Jersey, secretary of the American Federated of Silk Workers, and including Elizabeth Nord of Pawtucket, Rhode Island

## RICHBERG REPORTS TO PRESIDENT ON RISE FARM PRICES

WITHIN FIVE PER CENT OF 'PRE-WAR PARITY' BUT INCOME LOWER

WASHINGTON, Aug. 29.—(P)—Donald R. Richberg reported to President Roosevelt today that farm prices have risen to within five per cent of the famous "pre-war parity" which the administration has been striving to reach. The head of the president's executive council made plain that his figures include benefit payments received by farmers through the AAA. He also stressed that the drought slashed some major crops and "therefore the high prices do not mean a full corresponding increase in farm income."

He warned that for complete farm recovery "it is essential that there be more of a revival in industrial production and more extensive re-employment." In his first report, last Sunday, Richberg claimed marked industrial gains and, in particular, the re-employment of 4,120,000 persons.

"Pre-war parity" meaning the real price level of 1910 to 1914 as measured in terms of purchasing power, often has been cited as a goal of the Roosevelt agricultural program.

The report also declared:

1. Farm income for 1934 appears likely to exceed 1933 by about 19 per cent. While this was a "substantial gain," Richberg said, "it leaves farm income still far below the levels of 1923-29."

2. Rental and benefit payments made to farmers totaled \$31,000,000 between August, 1933, and June, 1934.

3. Farm income aggregated \$5,063,000,000 for 1933-34 as compared with \$3,881,000,000 for 1932-33.

Surpluses of major crops have been cut to about normal but the drought has "laid the basis for new surpluses." Control of crops should continue.

5. Government agencies now held more than 25 per cent of all farm debt as compared with 12.1 per cent at the beginning of 1930.

Richberg first noted that the AAA is "the agency charged with the responsibility of restoring the equitable balance between the price of the farm products and the price of the things the farmer buys."

"Surpluses of agricultural commodities were among the principal price depressing influences," Richberg said, "in March 1933, prices for seven basic commodities were 761 per cent of their 1910-1914 level."

"Prices of seven commodities originally designated as basic have risen from 51 per cent of the 1910-1914 relationship to 95 per cent exclusive of benefit payments," he added.

## J. H. HOLSEY DIED HERE LAST NIGHT; BURIAL WEDNESDAY

Funeral services for J. H. Holsey, aged 73 years, long-time resident of Navarro county, who died at his home on North Beeson street Tuesday night at 8:30 o'clock, were held from the family home Wednesday afternoon at 2 o'clock with burial in Oakwood cemetery. The rites were conducted by Rev. A. K. Marney pastor of the North Corsicana Methodist church.

Prior to moving to Corsicana, he resided in the Chatfield community for a number of years.

Surviving are his wife, four daughters, Misses Marie, Lucile, Edna and Hazel Holsey, and a son, Robert Holsey, all of Corsicana; four brothers, Walter, R. Holsey, Rockwell, and L. L. T. M. and W. W. Holsey, all of Corsicana; and a sister, Mrs. R. H. Foy, of Georgia.

The funeral was directed by the McCommon Funeral Home.

Active pallbearers were Lee Holsey, Mont Holsey, Wilbur Holsey, Walter Holsey, A. L. Huffman and J. W. Wright. Honorary pallbearers were J. C. McMullen, W. T. Thorp, M. J. McMullen, W. K. Elkins, Dr. Hugh Sloss, Hugh Hodge, Theo Montfort, W. Montfort and M. T. Montfort.

### COURTHOUSE NEWS

County Clerk's Office. Two new deputy county clerks have joined the staff of County Clerk L. C. Morgan this week. The new deputies are Fannie Bess Hardison and Ruby Lee.

Due to a large number of oil and gas leases and assignments and other documents filed for record in the past several weeks, the recording of instruments is running several weeks behind schedule and the two new members of the staff were employed to catch up with the work.

William Alvin Reese and Allie Mae Peeples.

Justice Court. A white man is charged in Judge Sam B. Jordan's court with intent to injure and a negro is named in an aggravated assault complaint in justice court at Rice as a result of an alleged altercation near Rice Saturday.

The negro is reported to have appeared before Judge Jordan Tuesday afternoon and filed a complaint against the white man. A short time later the negro was arrested by Constable R. A. Edens on the charge filed in Rice. A number of small shot were picked out of the side of the negro by a physician Tuesday.

## Rains Improve Range Prospects In West Texas

By The Associated Press. Range prospects were definitely improved and the soil conditioned for fall planting by rains in far west Texas and in scattered sections of north and east Texas yesterday.

The drought was broken in Dickens, Kent, Scurry, Mitchell and parts of Fisher counties, rainfall varying from a quarter of an inch to two inches.

Tyler, at the edge of the East Texas oil field, had slightly more than an inch of precipitation in an hour—the first rain of consequence there since last April. Austin reported "a sprinkle" and for the fifth consecutive day, showers cooled the air in Dallas, dropping the temperature from 83 at 4 p. m. to 65 at 6 p. m.

Jim Boze, claimant to a method for rainmaking, landed with Pilot Lou Foote of Dallas at Waxahachie and asserted that within five minutes after he had exploded 30 electrically charged bombs at 12,000 feet altitude, South of Waxahachie, showers "enough to run in the cotton rows" extended from the Penn farm in southern Ellis county southwestward to Maypearl and Hillsboro. He planned to go along again Wednesday and set off additional bombs, if cloud formations were favorable for his experiment.

## Bolivian High Command Claims Chaco Victory

LA PAZ, Bolivia, Aug. 30.—(P)—The Bolivian high command claimed a big victory in the Chaco warfare today, asserting the Paraguayan had been led into a trap in which 530 were killed.

A statement issued by military chiefs said the enemy in their haste to flee left behind a large quantity of equipment.

"Our troops at present are burying the bodies of 530 Paraguayans who fell in action yesterday," the statement said. "On the own cotton plantation were found rifles, machine guns, army equipment and ammunition in large quantities.

"This disorder gives an idea of the panic which seized the routed enemy forces which could not help but flee. The trap into which the enemy fell has had no equal in any campaign in the Gran Chaco up to today."

Lennie Jackson, who underwent an operation at the P. and S. Hospital last night, was doing nicely Thursday.

## ALL HIGH SCHOOL STUDENTS TO HAVE PROGRAMS MADE OUT

All High School students are to have their programs made before the opening day of school which is Wednesday, September 12. The schedule of classes for the High School has been arranged and will be printed in Friday's Daily Sun. We will start enrolling students Friday morning. Students who are anticipating a difficult schedule are advised to have their programs made as early as possible. Certain sections care care for only a limited number of pupils and those coming late will be compelled to elect other subjects for this half year.

Students who did not attend school in Corsicana last year and who are to be classified in the low ninth grade, or above, must be classified by the high school principal before September 10 if they expect admission on the opening day of school. The other duties of the principal on the opening day will likely delay new admissions after that date. Since all program will have been made before Monday, September 10, the teachers will meet their classes in regular schedule on Wednesday, September 12.

Some important facts concerning the requirements for graduation will be published tomorrow in the Corsicana Daily Sun.

## Heavy Downpour Of Rain Tuesday In Spur Sector

SPUR, Aug. 28.—(P)—A heavy downpour of rain began here just before dawn today and covered a fan-shaped area extending from the north to the southeast of Spur. It was the first heavy rain since last April in this section and it brought joy to stockmen and farmers. Up to 9 a. m. precipitation totaled 1.5 inches. Dickens City, 12 miles to the north, reported 2 inches.

The rain caused small streams to rise and halted many cars in muddy, unpaved streets and roads. Grasslands will be benefited to some extent but in the opinion of many farmers, the greatest profit comes in the salvation of late grain feed. In the last month feed prices have risen sharply.

Paul H. Robeson announced the opening of Robe's Battery and Electric Company at 211 West Collin street, in the building formerly occupied by the Davidson Battery & Electric Company. The interior of the building has been renovated recently and the most modern machinery and equipment has been installed.

## MAKE THIS MODEL AT HOME THE CORSICANA DAILY SUN DAILY PATTERN

A SLIP ESPECIALLY GOOD FOR LARGE FIGURES  
Pattern 2005

by *Anne Adams*

This is such a beautifully fitting slip that the size in it have been run up to fifty. But don't think you have to be a large woman to like it. It is lovely on a slender figure. It is simplicity itself to make and the seams follow such pretty lines they actually become a decoration. When you are planning your fall wardrobe don't forget to include some new slips. Summer always works havoc in one's lingerie and no self-respecting frock is going to look as it would worn over an old mis-shaped foundation. Made of a dark fabric this slip does perfectly under a transparent afternoon gown.

Pattern 2005 is available in sizes 34, 36, 38, 40, 42, 44, 46, 48 and 50. Size 36 takes 21-2 yards 38 inch fabric. Illustrated step-by-step sewing instructions included.

Send Fifteen Cents (15c) in coins or stamps (coins preferred) for this Anne Adams pattern. Other offices guarded by plain name, address and style number. Be sure to state size.

And while you are writing, why not include an order for a fascinating book, crammed from cover to cover with stunning illustrations and captivating descriptions of new fashions, fabrics and other things that make a woman chic.

Address orders to the Daily Sun Pattern Department, 243 West 17th Street, New York City.

## ROB'S BATTERY AND ELECTRIC COMPANY IS NEW BUSINESS

Paul H. Robeson announced the opening of Robe's Battery and Electric Company at 211 West Collin street, in the building formerly occupied by the Davidson Battery & Electric Company. The interior of the building has been renovated recently and the most modern machinery and equipment has been installed.

J. D. Montgomery, for 11 years connected with Ellis Tire & Bat-

tery Company, will be in charge of the starter, generator and automobile electric work. The radios and radio service will be under the capable management of Chris Franke, who has had many years practical radio repair experience. A complete line of tubes and radio parts of all kinds will be kept in stock at all times, and the new shop will make a specialty of auto radio installation and repair. The company will carry a full supply of Exide batteries of different sizes and prices. A. L. spark plug and many other standard parts.

Mr. Robeson, owner and manager, has been connected with the Ellis Tire & Battery Company 13 years, and invites his friends to visit him at his new location.

## TEXAS YOUTH AND GIRL HELD RESULT OF EXTORTION PLOT

### BANKER TOLD TO DEPOSIT \$500 OR INVALID DAUGHTER WOULD BE KILLED

HOLLIS, Okla., Aug. 29.—(P)—A boy and a girl were held here today for questioning in connection with a plot to extort \$500 from E. M. Slaughter, president of the National Bank of Commerce, under threat of death to the banker's invalid daughter, 15-year-old Jane Ann Slaughter.

County Attorney Ryan Kerr declined to disclose the names of the suspected persons involved in the plot, but he said he had not decided whether to turn them over to federal authorities.

They were arrested at a bridge several miles east of Hollis by officers who secreted themselves near a dummy package, after Slaughter had received a note demanding that he put \$500 under the bridge.

The note said that unless the money was delivered, the banker's daughter would be kidnapped and killed. Other officers guarded

the Slaughter home while the bridge was being watched. The boy who was arrested was described by the county attorney as about 20 years old, the girl 18. They are from Childress, Texas, the county attorney added, and were "moderately well dressed, apparently normal and of average intelligence." Both denied any connection with the plot.

The pencilled kidnap note, postmarked at Carey, Texas, was received by Slaughter Tuesday. Apparently printed in a woman's hand, it said:

"Tuesday, August 28, at 12 o'clock, place \$500 in \$10 and \$20 bills at the northeast corner of the bridge three miles east of Hollis. Do not notify police. If directions are not followed then your daughter will die by Wednesday, August 29."

Kerr said the couple was unable to explain their presence under the bridge, where officers found them.

The banker's daughter, Jane Ann, who has been partly paralyzed since she was struck by an automobile at the Chicago Exposition a year ago, was not told of the plot.

Last May she received considerable notice when she delivered the valedictory address to her junior class at the high school class by radio from a Dallas hospital bed. She now is at her father's home.

Mrs. H. J. Kent and baby boy were taken home Wednesday from the P. and S. Hospital.

FROST, Aug. 30.—(Spl.)—Porter Bailey and family spent Monday in Corsicana.

## UPTON SINCLAIR TO SEE PRESIDENT BUT POLITICS OUT

### ROOSEVELT CONFERNS WITH NORMAN DAVIS ON THE NAVAL CONFERENCE

HYDE PARK, N. Y., Aug. 30.—(AP)—President Roosevelt and Upton Sinclair, democratic candidate for governor of California are going to have a talk, but not over politics.

Sinclair, one-time socialist who carried off the democratic gubernatorial primaries in California Tuesday, and the President yesterday for an appointment, it was granted with the understanding Sinclair would come to talk business. Mr. Roosevelt has been keeping out of state political campaigns and will adhere to this policy, no matter who the candidate is.

When Sinclair will see the President was not indicated, although it was considered likely he will come to Hyde Park where the President plans to stay several weeks.

Mr. Roosevelt had a day free of appointments today and was making a visit to the Dutchess County Fair, the scene of his boyhood playground.

Although the President told newspapermen he hasn't even begun to work, he nevertheless has been devoting some time to the European situation and talked yesterday to Norman H. Davis, ambassador-at-large to Europe, and to Felix Frankfurter, Harvard law school dean, both on foreign matters.

The chief executive told Davis to return to London to seek some understanding at informal negotiations with Great Britain and Japan for a successful naval limitation conference next year.

## CATTLE PURCHASES IN NAVARRO COUNTY BELOW FULL QUOTA

Government officials in charge of the purchases of cattle in the emergency drought relief program failed to secure their full weekly quota in Navarro county this week because of the wide territory covered by the application for selection.

Having concluded their work for the week in this county, the apportioner and veterinarian moved to Hill county Thursday for the remainder of the week. Purchases for the week included 380 for shipment to processing plants, and 25 condemned. In gathering the 380 for this week, more than 120 contracts were handled, while last week's maximum was secured from 29 contracts.

Total purchases in the county have been 823 head, and total number condemned 69.

Officials renewed their appeal Thursday for cattle owners to pool their stock with their neighbors in bunches of 25 or more in order to facilitate the purchasing program.

## BLOOMING GROVE WOMAN DIED AT AGE OF 88 WEDNESDAY

BLOOMING GROVE, Aug. 30.—(AP)—Funeral services for Mrs. Mattie S. Wharton, age 88 years, who died at her home here at 4 o'clock Wednesday afternoon, were held Thursday afternoon at 4 o'clock. They were conducted by Rev. P. W. Utley. Burial was in Rose Hill cemetery.

Mrs. Wharton had been a resident of Blooming Grove 40 years or more and took an active part in civic and church affairs. Surviving are three sons, J. H. Wharton, Blooming Grove; J. L. Wharton, Kountze; E. H. Wharton, Waco, and other relatives.

McCormick Funeral Service had charge of the funeral arrangements.

## DEMOLAY OFFICERS WILL BE INSTALLED NEXT MEETING NIGHT

Public installation of Demolay officers will be held next regular meeting night which will be the first Tuesday in September. The following officers were elected at the last meeting of the order and will be installed: Allen Edens, Jr., M. C.; Irvin Samuels, S. C.; Joe Hashop, J. C.; Orrin Patrick, S. D.; Charles Jones, J. D.; Clifford Hampton, J. S.; Herman Bomar, J. S.; Robert Mitchell, O.; Harry Cleow, J. L. Dunn, Sentinel; Paul Marshaw, M.; William Hastings, C.; John Sullivan, S. B.; Duane Cook, William McGlothlin, Robert Inman, George Cunningham, Fred Mullin and James Brantley, receptors.

## Corsicanans Hurt In Auto Accident Davenport, Okla.

Mrs. J. P. Hamilton and daughter, Miss Elizabeth Hamilton, 741 West Second avenue, were returned to their home here at an early hour Thursday morning in a Sutherland-McCormick ambulance from Davenport, Oklahoma, suffering severe injuries sustained in an automobile accident there Tuesday.

The Hamilton automobile was demolished in the accident. Mrs. and Miss Hamilton were enroute at the time of the crash having been visiting relatives in Tulsa.

## GARNER

(Continued from Page One) whether Garner would accept the nomination. A movement was made on the resolution, led by C. Adams, of Dallas, a national committeeman to give the honor to Garner but it was blocked.

Ferguson was nominated for the office by the State Democratic executive committee at Houston in March but his nomination has not been accepted by the national committee. The most bitter fight of the convention was expected should Ferguson resist efforts to replace him.

### Merely Courtesy Call.

Commenting on the report Allred said he made Garner a "courtesy call." He said Garner and he had been friends for years.

Allred said he was conferring with friends over the state concerning both the national committee and the chairman of the state democratic executive committee. He declined to say who he would support for the latter post.

Ferguson has said he was "the national committee man" and that the next move was up to his opposition. The Ferguson-controlled executive committee probably will be retired at the convention and replaced by a committee favorable to Allred.

Proceeding methodically, they took a guard's keys and released three other inmates, tossing back the keys as they left. An armed watchman outside the building did not see them as they stole away in the darkness.

## Cash Prizes Offered For Best Dancers

Robert Cooksey announced Thursday that cash prizes would be given the best dancers at Mineral Plunge Saturday night.

A fiddle band from Dallas has been secured to play for the dance.

"We are not going to the convention specifically to fight some body," Allred said. "We want to end these 'isms' and make it a progressive convention if we can. Naturally I would prefer to have friends of unquestioned loyalty to the posts of honor."

Allred said he would take no part in the campaign between Coke Stevenson of Junction and J. B. Ford of McGregor for speakership of the 44th legislature.

"That is up to the legislature," he said. "Of course I want the cooperation of all members of both the house and senate."

He also said the question of relief "still is in the hands of the present administration." The legislature now is in special session to issue additional state bonds for relief.

### Will Not Address Legislature.

Allred said he would "respectfully decline" the invitation of the legislature to address it and would not make any public addresses until the Galveston convention. He said he had asked friends in the legislature to recommit a resolution asking him to speak out hoped to meet all the members personally.

The nominee said he was "near-

Garner Is Reticent.

VALDDE, Tex., Aug. 30.—(AP)—Vice-President John N. Garner, had not a word to say today concerning reports emanating from Austin to the effect that he was being mentioned prominently as a prospect for democratic National committeeman from Texas.

Garner is reticent.

At the House of Representatives, he said, "I have not been able to obtain any rest since his nomination. He said he lost 21 pounds during the strenuous campaign.

He also said the question of relief "still is in the hands of the present administration." The legislature now is in special session to issue additional state bonds for relief.

### Strike to Be Costly

It has been estimated by union

leaders that a strike of the magnitude of a general strike in the cotton industry would cost in excess of \$1,000,000 a week to maintain. The United Textile Workers of America at the present time

have less than \$1,000,000 in their general treasury.

Union leaders are faced with a

problem primarily of finance if

they are to make a long term

strike effective. While they have

the power to call out some 450,000 additional workers in silk,

wool, rayon, and worsted plants,

it is generally understood that

their strategy will be to keep

these workers at their jobs to ob-

tain money for the strikers on the

cotton front.

Union leaders see hope for ad-

ditional aid through the relief ad-

ministration. They base this on

Rep. J. Long of

Wichita Falls, sponsor of the

pending bill, said the Texas relief

commission likely would complete

a statement of expenditures soon.

Members of both the house and

senate displayed unwillingness to

act on the matter without an

accounting of previous disburse-

ments.

A proposal also was pending in

the house to depart from regular

procedure and request Governor

Miriam A. Ferguson and the relief

commission to sit with the

House.

Textile operators have indicated

they will not attempt to carry

retaliation measures into other

sections of the industry. There

has been no discussion of closing

down other mills not affected by

the strike to reduce the pos-

sibility of financial aid to the

strikers, the textile institute in-

dicated today.

## JUST FOLKS

(Copyright, 1932, Ed. A. Guest.)

## HEREDITY

I am like him, so they say.  
Who was dead before I came.  
Cheeks and mouth and eyes of  
gray  
Have been fashioned much the  
same.

I am like her, so they say.  
Who was dead ere I was born,  
And I walk the self-same way  
On the paths her feet have  
worn.

There is that within my face  
And the way I hold my head  
Which seems strangely to replace  
Those who long have joined the  
dead.

Thus across the distance far  
In the body housing me  
Both my great-grandparents are  
Kept alive in memory.

NINE LAYERS OF  
HISTORY

The more work they find for themselves to do, the happier are archeologists. Digging for one ancient city and finding nine might seem to the uninitiated almost too much in the way of success. To the archeologist it is a tremendous stroke of good fortune.

The remains of the nine cities of the past which took turns occupying the site of ancient Troy are enabling the scientific diggers to compare a number of civilizations at once. From the primitive Bronze-Age village of 5,000 years ago, to the Graeco-Roman city that passed away more than 1,500 years ago, the nine layers are revealing many fascinating historical matters.

From the different levels

have come twenty tons of pottery, a half dozen rare jars used as storage bins, evidences of a palace with mosaic floors and delicately carved marble screens, and even a Roman theatre with a seating capacity of 5,000.

If seers could just reveal the future as archeologists reconstruct the hitherto mysterious past, we might be able to do more about the present.

## SEQUESTRING SILVER

The average American, delighted or terrified by the sequestration of silver, has probably forgotten entirely the fact that there was an Economic Conference in London last summer. At that time international agreements were arrived at to limit the sales of silver in the world market and to stabilize the price of that metal.

India was to limit its sales to 35,000,000 ounces a year. Spain to 5,000,000. China to zero. The United States, Canada, Australia, Mexico and Peru were to absorb and take off the market 35,000,000 ounces. The United States is moving, one step at a time, in the direction of keeping its agreement.

The certificates to be issued against the silver so set aside in the Treasury will undoubtedly produce a slight and short inflation. The chief danger from the situation as it stands seems to be not the inflation itself, but the increase in bank reserves soon to result. Hoarding in bank vaults the money which ought to be moving around the country is not so good—not much better, in fact, than hoarding it in private boxes.

## OUT OF HAITI

The Haitians and the United States Marines have now said their final farewells. On August 14 the American flag was lowered for the last time at Portau-Prince, and the Haitian flag was raised on a pole in front of marine headquarters. Hereafter, Haiti will be protected by its own military forces.

Haiti is glad. The United States is glad. All Latin America breathes more easily and begins to glow with a friendlier feeling toward the United States. It is likely, now, that there will be more good will and more really effective cooperation between the North and South American republics than there has ever been before. The removal of the southern countries' fear and suspicion of the big republic to the north of them is an incalculable gain for all concerned.

Patou, famous Paris dressmaker, advertised for fashionable models. American girls responded in generous numbers, and most of the successful candidates were from the Middle West. Go west, young woman, if you want to learn how to wear clothes.

## HOW TIMES HAVE CHANGED—

—By Clive Weed

## VERTICAL VOYAGES

## HAPPIER CITY FINANCES

The big cities are beginning to have hope of climbing out of the red. It is reported that the books of the nation's municipalities are being written in black ink once more. In many of them the financial outlook is even called "bright."

For a while it was feared that many cities would go into receivership, as Key West did. It is possible that some may still be in acute peril. On the whole, however, heroic measures are bringing the desired effects.

Balanced budgets, strict economies, rigidly enforced, increased tax collections with delinquent taxes coming in which many officials never expected to see, are easing the situation. Back salaries for school teachers and other public employees are being paid. In some cases it has been possible to restore salary cuts, though that is rare so far.

The manager of Kansas City reports "no unpaid bills, no unpaid salaries, city employees working full time."

Philadelphia reports delinquent tax collections "breaking all records."

Detroit's operating deficit in July was \$8,740,000 as compared with an operating deficit of \$11,300,000 in July, 1933. Further decrease is in sight.

So the story goes. The worst is NOT going to happen this time. Have the cities learned a lasting lesson from their recent desperate plight?

## PICTURES OF RAYS

It is rather good to know that a great deal of scientific data is being salvaged from the wreckage of the stratosphere balloon which came down on a Nebraska farm a few weeks ago. The film record of cosmic rays proved sharp, clear and complete, say the scientists who are going over what is left of the balloon and its equipment.

A very unscientific observer wonders what is proved about a cosmic ray from the picture left on the ray detector. Photographs of the starry heavens are singularly disappointing to one who loves to lie on his back on a summer night and enjoy the stars. Blueprints of a home mean little to most of those who love to gather around its hearthfire. The mathematical inner nature of things is very curious!

There is the further fact that voters in Ohio don't like lavish campaign spending. A political war chest can be too well filled and prove a liability instead of an asset.

It will be a good thing for the country, when government officials, in the smallest government units

MATTRESS FACTORY  
FOR NEEDY TO BE  
OPENED HERE SOONPROJECT APPROVED FOR  
CANNING FACTORY—IN OP-  
ERATION NEXT WEEK

Opening of the mattress factory in Corsicana to supply bedding for the families in need of such materials on the relief rolls is expected within a few days, according to W. D. Robinson, county administrator.

Mr. Robinson reported that 50 bales of cotton had been bought for the mattress making and was stored in a Corsicana warehouse, and that ticking and twine had been bought but not yet delivered. He also reported that the machinery of the Made-Rite Mattress Factory on East Seventh avenue had been leased and would be used by experienced workers on the relief rolls.

Approximately 700 mattresses can be made from the supply of cotton now on hand, and other supplies are expected when these are exhausted, relief officials said. Twenty-eight contracts have been entered into with the manufacturers for the making of the mattresses, and it is expected that these places will make mattresses needed in their counties than those in which they are located.

Approval of the project for the completion of the equipping of the local cannery unit was also reported, and it is anticipated that this unit will be in operation early next week. Meats and vegetables will be canned on a toll basis for the producers of the county and the food thus accumulated will be used for feeding families on the relief rolls during the winter.

Mr. Robinson also announced that 20 carpenters and four painters were sent to Woods Lake in Trinity county to a rehabilitation project from Navarro county.

A total of 443 cattle purchased by the government through the medium of the FERA were shipped from Navarro county last week, and another shipment was scheduled to be made Tuesday of the purchases made on Monday. The appraiser and veterinarian are spending three days each week in this county and three in Hill county.

Some work is still being done on McLendon Park finishing up that project, but orders have been received to close the job by Aug. 30.

GARMENT INDUSTRY  
DECIDES TO REJECT  
NEW CODE ORDERSCORSICANA PUBLIC  
SCHOOLS WILL OPEN  
WEDNESDAY, SEPT. 12BUILDINGS RENOVATED DUR-  
ING VACATION PERIOD;  
CALENDAR FOR YEAR

Classes in all the Corsicana public schools will open the 1934-fall semester Wednesday morning, Sept. 12, with complete schedules being run for the day, it was announced Tuesday by W. H. Norwood, superintendent, who also released a copy of the school calendar for the 1934-35 school year.

A corps of workers and janitors has been busily engaged all the summer renovating the buildings, and putting everything in order for the nine-months school year.

Practically all the floors have been either waxed and polished, or given a coat of oil; desk tops have been refinished and other minor repairs have been made on the buildings.

The president issued an order last Tuesday providing a maximum week of 36 hours instead of 40, with no decrease in minimum weekly wage, and also increasing piece rates 10 per cent over those of May 1.

This order the manufacturers turned down as "unjustifiable, unwarranted, burdensome and inequitable." They authorized their counsel, Raymond A. Walsh, in Washington to take steps if necessary to protect their rights and interests and indicated they would fight the president's order in the courts.

The manufacturers issued a statement saying the increase in minimum cost under the order would be at least 9 per cent instead of 2 per cent as held by the NRA. The statement said also that hourly wages in the industry would be 20 per cent higher than on July 1, 1929.

In announcing the school calendar, Superintendent Norwood pointed out that it was made to allow 175 days of school during the nine-months, which is required for the Corsicana schools to retain their affiliation with the Southern Association of Colleges and Secondary schools.

Following is the school calendar as announced today by Superintendent Norwood:

September 12, 1934—Wednesday, fall semester begins.

November 9, 1934—Friday, Armistice Day, holiday.

December 22, 1934 to January 2, 1935—Christmas holidays.

January 25, 1935—Friday, fall semester closes.

January 28, 1935—Monday, spring semester begins.

February 22, 1935—Friday, Washington's birthday, holiday.

One Friday will be given as City Interscholastic League day.

One Friday will be given as district Interscholastic League day.

May 31, 1935—Friday, spring semester closes.

Principal of the junior and senior high schools have made out their schedules, and shaped their plans for the opening day. The schedule of the senior high school will be announced the latter part of this week. The faculty assignments will also be made in the near future.

In announcing the school calendar, Superintendent Norwood pointed out that it was made to allow 175 days of school during the nine-months, which is required for the Corsicana schools to retain their affiliation with the Southern Association of Colleges and Secondary schools.

Following is the school calendar as announced today by Superintendent Norwood:

September 12, 1934—Wednesday, fall semester begins.

November 9, 1934—Friday, Armistice Day, holiday.

December 22, 1934 to January 2, 1935—Christmas holidays.

January 25, 1935—Friday, fall semester closes.

January 28, 1935—Monday, spring semester begins.

February 22, 1935—Friday, Washington's birthday, holiday.

One Friday will be given as City Interscholastic League day.

One Friday will be given as district Interscholastic League day.

May 31, 1935—Friday, spring semester closes.

New Industry For

Corsicana Opened

Cater Local Trade

Corsicana has a new industry that will be of much interest to Navarro county residents and quite a number of those in Corsicana. It is a custom mill, grinding whole wheat flour and old-fashioned corn meal.

The mill, located at the corner of North Commerce street and West Second avenue, in the old Mittens building, will also grind and sell all kinds of stock and chicken feeds. Custom milling will also be done.

Harry E. Ford, long-time resident of Corsicana, but recently having returned here after several years in West Texas, is the proprietor of the new enterprise, which will be known as Bird's Mill.

Mr. Ford also states that he will buy and ship sour cream from his plant and that farmers will receive their pay on delivery of the cream.

## Cream Supper

There will be an ice cream sup-  
per at Dresden Tabernacle Friday  
night Aug. 31. Benefit of the M.  
E. church. Everybody cordially  
invited.

quick results.

## Pledge

I will think—talk—write . . . Texas  
Centennial in 1936! This is to be my  
celebration. In its achievement I may  
give free play to my patriotic love for  
Texas heroic past; my confidence in  
its glories that are to be. . . .

FOREIGN MARKETS ABANDONED  
IN AAA PROGRAM FOR COMING  
YEAR OFFICIALS INDICATE

WASHINGTON, Aug. 28.—(AP)—The same sort of adjustment calling for production of about 775,000,000 bushels of wheat, 625,000,000 bushels, to meet the carryover and leave a margin for export purposes.

In preparing the livestock plan, the same idea predominates. Actual control of hogs and beef cattle, of corn, wheat, rye and grain sorghum, with these grains brought together in a composite contract.

In the midst of planning the future, officials found time to look at the present. The Bureau of Agricultural Economics issued an estimate that cash income of farmers from all sources this year will be about \$6,000,000,000, an increase of 19 per cent over last year and 39 per cent over 1932.

The figures include income from sale of farm products, rents and benefit payments of about \$350,000,000 for adjusting production cash received from the sale of cattle, sheep and goats to the AAA in drought areas. The benefits are expected to total about \$103,000,000.

## INFORMATION FOR STUDENTS, PARENTS OF CORTICANA HIGH PARENTS SHOULD KEEP IN TOUCH WITH SCHOOLS AND ADVISE WITH STUDENTS

High school students may check their programs in Friday's Daily Sun.

### Planning Your High School Work

Parents should keep in touch with their children about the selection of courses to take in high school. Many pupils fail to get admission to the college or university which they desire because they fail to do a high quality of work in high school, or because they do not choose the courses which will fit them for that particular institution. The requirements for college entrance are not identical in every case. If the parent and pupil will decide by the beginning of the senior year what college or university they expect to patronize, much valuable advice can be given by the principal of the high school or by the advisory teacher. This service is placed at the disposal of parents of the schools.

### Definition of Unit

A unit represents nine months of study in a high school subject, constituting approximately a quarter of a full year's work. A four-year secondary school curriculum should be regarded as representing not more than sixteen units of work.

### Units for Graduation

In order to graduate from the Corsicana Senior High School, a student must complete sixteen units of high school work as defined above. Four of these units must be in English, two in history (world history and American history), one in science and two in mathematics.

Studying and cooking are not accepted as the required unit in science. If the pupil expects to enter a college, he should take two units from the Foreign Language Group or the Natural Science group.

In addition to this, he should choose enough units to give him a total of fifteen accepted units for college entrance.

### Entrance to University of Texas

Since the entrance requirements to a college or university are about the same, I will give the entrance requirements of Texas University in order that a student expecting to enter a college or university after graduating from high school may be guided wisely in selecting his high school subjects.

### Entrance Requirements to the College of Arts and Sciences and College of Pharmacy

Units

(1) English (required of every student)..... 3

(2) From the Mathematics Group in Section A, below 2

(3) Two units from each of any two of the three groups in Section A below (Foreign Language Group, Natural Science Group, Social Science Group), total..... 4

The Corsicana Senior High School is a member of the Southern Association of Secondary Schools. This membership entitles all graduates of the high school who meet college entrance requirements the privilege of entering any college or university in the southern states without examination. This privilege is also extended by all leading universities in the United States except those that permit entrance by examination only. The units of affiliation which have been granted the Corsicana High School are as follows:

## BEAUTY CHATS

By EDNA KENT FORBES

All requests for beauty information desired by Edna Kent Forbes entitle the author to a full self-addressed, stamped envelope (a.s.a.e.) and two postage stamps, and a copy of printed material. For the illustrated pamphlet, "BEAUTY," ten cents in stamps will be sent. Address Miss Forbes in care of this paper.

## WEEKLY BEAUTY EXPENDITURES

How Much Do You Spend. Miss Forbes tells you today how much you can buy for five dollars in the way of needful cosmetics. This is far the girl on a budget whether she works or lives at home.

How much should a girl on a moderate salary spend on beautifying herself? This is a hard question to answer, yet I have to answer it any number of times a week, in letters to correspondents. And each case seems to me to need a different answer.

Anabel, for instance, poses for pictures in her spare time—that is, she poses with hats and dresses on for advertising illustrations. In her case, hair, nails and complexion must be perfect. No cheap beauty shop can match those pampered by rich women (who are supposed to wear E. K. Forbes' clothes she models).

So her weekly shampoo and wave cost nearly two dollars, her manicure, with tips, seventy-five cents, and the weekly face massage, which is a beauty investment, a full five dollars. Nearly eight precious dollars, cut of a possible twenty or twenty-five.

Jane is a secretary, with ambitions to become a dress designer. A shampoo and wave, done by a shop open in the evenings just for business girls, costs her a dollar, and her manicure fifty cents, with tips, she gets out of these necessities under two dollars. Next week she adds the price will go up, for she'll have to add a face massage, which in her cut rate shop is two dollars. Miss Price likes to have thin hair treated, twice a week—a dollar a time. A Working Girl, writing today, solved her problem by going to a school where beauty shop assistants are trained, and the whole thing, face, hair and nails, come to just over a dollar.

I think, though, that every girl who works, and who isn't a genius at doing her hair and nails, should afford between one dollar and a half and two dollars weekly, and have her hair kept trimmed, wavy.

New York Cotton Steady.

NEW YORK, Aug. 30.—(AP)—Cotton futures closed barely steady, 15 to 18 lower on prospects for a textile strike and disappointing Liverpool market.

Chicago, Aug. 29, 13.31; March 13.23; May 13.43; July 13.50.

Trading was quiet at the start, with dealers easing off to 13.12 on May 20.

Trading was quiet after the strike, which was lower after the strike started, and the price was 6 to 8 lower.

Producers said that weather report was offset by the strike news, but that

the strike by the northern trading centers, by the northern trading centers.

Trading continued quiet, with busi-

ness largely in the form of switching from near contracts, and with some buying and selling of late month contracts.

The market was 10 to 12 points higher, with most of the hedge sales.

First trades showed losses of 10 to 12 points, but the market closed little higher after the start on selling by ring traders until October dropped to 13.14 and December to 13.24, or 10 points at midmonth.

Future closed barely steady 14.17.

Spot quiet; middling 13.50.

New Orleans Cotton Steady.

NEW ORLEANS, Aug. 30.—(AP)—Cotton opened easier today, mainly owing to the unfavorable textile strike news. The market was 10 to 12 points higher, with most of the hedge sales.

First trades showed losses of 10 to 12 points, but the market closed little higher after the start on selling by ring traders until October dropped to 13.14 and December to 13.21, or 10 points at midmonth.

The market was steady and at the low.

A private authority estimated the crop at 9.45.

600 bales. This was practically the total

brought out by this authority a month ago.

N. Y. Cottonless Oil Steady.

NEW YORK, Aug. 30.—(AP)—Cotton opened easier today, mainly owing to the unfavorable textile strike news. The market was 10 to 12 points higher, with most of the hedge sales.

First trades showed losses of 10 to 12 points, but the market closed little higher after the start on selling by ring traders until October dropped to 13.14 and December to 13.21, or 10 points at midmonth.

The market was steady and at the low.

A private authority estimated the crop at 9.45.

600 bales. This was practically the total

brought out by this authority a month ago.

N. Y. Cottonless Oil Steady.

NEW ORLEANS, Aug. 30.—(AP)—Cottonless oil closed steady; prime sum-

mer yellow 6.80 in 6.80; prime crude

yellow 6.80; No. 1 6.80; No. 2 6.82; Dec. 6.81; Jan. 7.05; March 7.05.

Call Money Steady.

NEW YORK, Aug. 30.—(AP)—Call money steady, 1 cent, all day

## GETTING DOWN TO BED ROCK IN THE PRACTICE OF RELIGION

Old Hebrew Prophet Reduced the Will of God  
For Man Into a Single Sentence as An Adequate Creed—An Ancient Program in New Progress.

By WILLIAM T. ELLIS

Everybody thinks about religion at some time or other. Some persons think about it a great deal of the time. They delight to dwell upon its mysteries, its subtleties, its intricacies. Many persons, on the other hand, turn from the subject baffled, because it seems too high and involved for them. There ought to be some simple, plenary form of religion which everybody may practice. An important subject should not be an impractical one for the plain person. Where may we look for a workable program of piety? An almost unknown Hebrew prophet, so far as his personality goes, has given the best statement of applied religion from the Old Testament standpoint. It is a familiar creed, which many persons have avowed as their plan of life with respect to the Almighty. It is easily memorized, and will stand all the thinking man who has brought it to bear upon it. This famous statement by the prophet Micah, which is the heart of the present lesson, is: "What doth the Lord require of thee, but to do justly and to love mercy, and to walk humbly with God?"

A Rule of Life. I command Micah's creed to all the persons who write me problem letters. It is rather amazing how large a proportion of a religious teacher's correspondence is made up of inquiries from men and women who are perplexed about materialism, perfectionism, sophistry, Anti-Israelianism, and other excursions into the non-religious fields of religious speciation. Leaving the main highways of truth, they naturally run into traps on the side roads.

Suppose we stick to Micah's splendid definition. It is a plain path for everybody's travel. By following this road we escape the pitfalls of perplexing philosophies. There are difficulties aplenty in the Bible, of course. But for ordinary folk it is enough to "do justly"—fulfillment of that requirement would solve all our economic woes. To love God, by which means God will in all-human relationships, ending strife and war, and the petty cares, that mark our days—"and to walk humbly with the God"—not challenging and critically and speculatively, but as little children trustingly holding the hand of a Father.

What a revival of religion there would be in the land if we should stop arguing about the Virgin birth, fundamentalism, denominationalism, ritualism, so so forth, and give ourselves wholly to trying to measure up to Micah's comprehensive definition of man's duty toward his Maker. Of course, there is more to faith than that expressed—Micah 6:8 needs to be supplemented by John 3:16: "For God so loved the world that he gave his only begotten Son that whosoever believeth in him should not perish but have everlasting life." But the Micah road will ultimately lead to Calvary, "A Vision of Good People." This morning I have been strolling about a rocky little island in

dy. A sense of awareness of God, and of responsibility to him, lifts up and dignifies all of life. "What doth the Lord require of thee?" Evidently, He requires something. There is an obligation implied. A great statesman once said that the most solemn thought that ever came to him was a sense of his personal responsibility to the living God. Nobody is functioning as an adult human being who is without some measure of this consciousness. We must restate God before we can live as men and women.

When folks get to thinking about doing justly, loving kindness, and walking humbly—not arrogantly and self-complacently—we find all life lifted up to new levels of nobler conduct. Here is an obligation, giving fuller play to the highest powers of mortal mind. This means life, and life more abundantly. May we not adopt the simple resolution to memorize this magnificent summary of practical religion; to repeat it to ourselves at least once daily; and to apply it in the ever-recurring situations which call for decision? Let the tides of God flow in to lift the level of our living.

### Ritualism vs. Righteousness.

With the daily paper at our elbow, it is interesting to read the messages to these old Hebrew prophets who spoke to unheeding ears more than 2500 years ago. Their words are as timely as the day's headlines. All were attuned to two major notes. Micah shares the theme of Amos and Hosea and Isaiah and the others.

All pictured the yearning brooding, Father care of God for His people. In beautiful imagery they portray the heart of a loving Lord who tenderly cherished Israel. Sometimes we speak of the stern majesty of the Old Testament God; to do so ignores the note of that sounds throughout the whole volume, "God is love" is written large over these ancient pages.

Another note sounds recurrently. In our lesson as elsewhere, God was impatient of a religious ritualism that was not accompanied by some righteousness. His prophets spoke in contemptuous disdain of sacrifices and feasts and ecclesiastical correctness, when moral rotteness and greed and cruelty and injustice prevailed.

Orthodoxy is no substitute for straight dealing. Justice means more to God than incense.

### A Remedy for Decline.

More of this is our greatest need. I know some towns that are dying of dry rot. Life is drifting away in incredible pell-mell of thinking and living. There is no apparent vital interest, no mastering motive. Ambition seems dead and buried in the grave of a community indifference. And I know city groups which suffer from other forms of the same blight: so that existence is little more than a hectic rush to ward off jadedness by artificial stimulation. There is no real living in the sense of free, joyous, abundant, purposeful life.

Our lesson points out the remedy, but as little children trustingly holding the hand of a Father.

Leaving the main highways of truth, they naturally run into traps on the side roads.

Suppose we stick to Micah's splendid definition. It is a plain path for everybody's travel. By following this road we escape the pitfalls of perplexing philosophies. There are difficulties aplenty in the Bible, of course. But for ordinary folk it is enough to "do justly"—fulfillment of that requirement would solve all our economic woes. To love God, by which means God will in all-human relationships, ending strife and war, and the petty cares, that mark our days—"and to walk humbly with the God"—not challenging and critically and speculatively, but as little children trustingly holding the hand of a Father.

What a revival of religion there would be in the land if we should stop arguing about the Virgin birth, fundamentalism, denominationalism, ritualism, so so forth, and give ourselves wholly to trying to measure up to Micah's comprehensive definition of man's duty toward his Maker. Of course, there is more to faith than that expressed—Micah 6:8 needs to be supplemented by John 3:16: "For God so loved the world that he gave his only begotten Son that whosoever believeth in him should not perish but have everlasting life." But the Micah road will ultimately lead to Calvary, "A Vision of Good People." This morning I have been strolling about a rocky little island in

the educational building Friday morning, August 31, at 9:30.

All members of Methodist churches are invited.

There will be a covered dish luncheon at noon.

Mrs. J. W. Spivey conference president of Waco, and Mrs. Gid J. Bryan, Waco, conference su-

perintendent of study will be present.

The book "Suzuki of Japan" will be used this fall and winter as a study course, will be reviewed at this meeting.

Members of the Methodist Mission Societies throughout the district are expected to be present.

Sick and Convalescent. G. A. Palmer underwent a major operation Thursday morning at the P. and S. Hospital and was resting nicely this afternoon. Mrs. J. D. Barnaby was doing nicely. Thursday afternoon at the P. and S. Hospital following an operation Wednesday.

## TWO NEGROES HELD CONNECTION WITH RECENT BURGLARY

Two negroes were in the city jail Thursday waiting arrival of federal officers to transfer them to Dallas jail in connection with the burglary of the baggage room of the Southern Pacific depot on the night of August 21 and the robbery of second-class mail sacks.

The arrests were made Wednesday by Chief of Detective Bruce Nutt and both of the negroes are reported to have made statements to Nutt and Postoffice Inspector A. C. Caldwell.

Some tires and tubes, larger supplies, trousers, overalls, shoes and other goods stolen have been recovered. It was reported that federal charges would be filed against the pair Thursday morning.

Reports were numerous Wednesday that the well had been shut down until preparations could be completed to bring in a producer. Sponsors of the test denied the reports, and reasserted that the shutdown had been occasioned by the necessity of running a string of ten-inch casing because of a heaving shale strata in the vicinity of 4,000 feet. No favorable showing has been reported in the drilling operation to date.

Late reports from Mexia stated that the Peyton Brothers Sunday school test and the Stubenrauch farm west of the Mexia oil field was shutdown for repairs. A fifteen-foot cased core was reported taken Tuesday night down to 5,620 feet, and another core was attempted Wednesday.

Scouts and operators are watching the two tests closely and numerous inquiries have been reported on leases and royalty at some distance from the tests.

## DRILLING RESUMED WEDNESDAY NIGHT ON WHEELOCK TEST

Completing necessary changes made Thursday morning, the hole was washed down, and the bit regained the bottom of the hole for resumption of the search for the Trinity sands. Operators hope to make steady progress but will proceed cautiously through the Glenrose formation which has been engaging them for some time.

Plug was drilled at 4360 feet early Thursday morning, the hole washed down, and the bit regained the bottom of the hole for resumption of the search for the Trinity sands. Operators hope to make steady progress but will proceed cautiously through the Glenrose formation which has been engaging them for some time.

Reports were numerous Wednesday that the well had been shut down until preparations could be completed to bring in a producer. Sponsors of the test denied the reports, and reasserted that the shutdown had been occasioned by the necessity of running a string of ten-inch casing because of a heaving shale strata in the vicinity of 4,000 feet. No favorable showing has been reported in the drilling operation to date.

So I go on not knowing,  
I would not if I might;  
I'd rather walk with God in the  
dark

Than walk alone in the light;  
To rather go with Him by faith  
Than walk alone by sight.

—David J. Burrell.
